PROJECTS

KNUST CSS FORUM: Creating a forum that can connect computer science students in our college

That will also help students in the college get access to free learning materials.

<https://knust-css-forum.netlify.app>

Created Windows Form in Visual Basic that calculate the commission for an Auto Center

Created a form in Visual Basic that calculate the sales for movies purchase for a business

Created a mobile app with Android that can suggest the diet for a user daily according to their age with a team.
